

B VENKATA AVINASH

Frontend Developer

📞 7780607853 @avinash.avi7a@gmail.com

SKILLS

React Js	JavaScript ES6+	
Node Js	Express Js	
Material UI	MongoDB	Git
Github	HTML5	CSS3
AWS	Vercel	

SUMMARY

Frontend Developer with 2+ years of professional experience in designing, developing, and maintaining scalable web applications using React.js, JavaScript, HTML5, CSS3, and modern frontend technologies. Experienced in building responsive, user-centric interfaces, integrating REST APIs, optimizing application performance, and collaborating with cross-functional teams in Agile environments. Possesses hands-on experience with the MERN Stack, enabling effective collaboration across frontend and backend development. Passionate about creating high-quality software solutions and leveraging AI-powered development tools to improve productivity and code quality.

EXPERIENCE

Frontend developer

Tangentworks Technologies Pvt Ltd

📅 02/2024 📍 Chennai

- Developed responsive web applications using React.js, JavaScript, HTML, and CSS.
- Built reusable components and integrated REST APIs.
- Collaborated with cross-functional teams to deliver high-quality features.
- Improved application performance and user experience.

PROJECTS

Charity Connect- Charity Donation Platform

Technologies: MongoDB, Express.js, React.js, Node.js, Material UI, Razorpay, JWT, Auth.js

GitHub:<https://github.com/undergit995/CharityConnect.git>

- Multi-Role Ecosystem: Architected a full-stack charity platform supporting three distinct user roles (Donors, Charity Organizations, and Administrators) with explicit role-based access control (RBAC).
- Automated Workflow Verification: Engineered a multi-step verification pipeline allowing admins to audit charity credentials and approve individual fundraising campaigns before publishing.
- Secure Payment Integration: Integrated Razorpay API to handle diverse payment methods (UPI, Cards, Net Banking) alongside automated backend PDF receipt generation.
- AI-Accelerated Development: Utilized advanced AI tools (ChatGPT, GitHub Copilot) to generate edge-case validation schemas, debug asynchronous payment webhook operations, and draft technical documentation.

Kitchen Cooks

Technologies: MongoDB, Express.js, React.js, Node.js, Redux Toolkit, Material UI, Socket.io, React Router

GitHub:<https://github.com/undergit995/kitchencooks.git>

- Dynamic Route Protection: Developed a secure frontend routing architecture utilizing custom client-side guards (ProtectedRoutes) for separate Admin and Customer user workspaces.
- State & Data Management: Leveraged Redux Toolkit to synchronize global state operations across a custom shopping cart, applied coupon discounts, and itemized user profiles.
- E-Commerce Operations: Built complex modules for full product CRUD operations, dynamic order tracking dashboards, review/rating submission workflows, and custom coupon creation interfaces.
- Authentication Pipeline: Designed a comprehensive onboarding process incorporating multi-stage verification including Email Verification and secure OTP flows.

PROJECTS

Quiz App

Technologies: React.js, JavaScript (ES6+), Redux Toolkit, Material UI, React Router, Vercel

GitHub: <https://github.com/undergit995/Quiz-App>,

- Component-Driven Architecture: Developed a responsive and interactive single-page application (SPA) enabling users to challenge categorized, timed questionnaires.
- Centralized State Control: Managed high-frequency global state updates through Redux Toolkit to efficiently process user answers, countdown timers, and final scoring matrices.
- Dynamic Rendering Engine: Programmed a modular question-rendering engine that dynamically alters UI layouts based on the chosen quiz theme and category parameters.
- Fluid UI/UX Layouts: Crafted clean, adaptive web interfaces using Material UI components to preserve crisp responsiveness across mobile, tablet, and desktop views.

EDUCATION

Bachelor of Technology, Electronics and Communication Engineering

Vellore Institute of technology, Vellore
